

Maintenance ...Delivered Consistently

“Prevention is worth a pound of cure” applies to more than just good old-fashioned medicine. The same applies to equipment, and D.M. Bowman’s comprehensive maintenance program supports its consistency of service by eliminating problems before they occur. Using late-model equipment only, every tractor in the fleet receives comprehensive check-ups every 15,000 and 30,000 miles, in addition to standard pre- and post-trip inspections. When the vehicle has logged 400,000 miles, it moves to the company’s resale facility. D.M. Bowman also offers its proven maintenance program to trucks outside its fleet in Williamsport and Frederick, Maryland, Somerset, Pennsylvania, and Huntersville, North Carolina. Trucks that bear the D.M. Bowman name are indicative of their inherent quality.
